Sustainable Development Goals (1-17)

FACTS on SDGs

SDGs are action oriented, global in nature and universally applicable. They take into account different national realities, capacities and levels of development and respect national policies and priorities.

Targets are defined as aspirational global targets, with each government setting its own national targets guided by the global level of ambition but taking into account national circumstances.

Each goal has a set of targets to achieve by 2030, with 169 targets in total.

Economic Development

- The SDGs aim to encourage sustained economic growth by achieving higher levels of productivity and decent work for both Gender (Male and Female) by 2030.
- Achieving the SDGs will mean ending poverty in all its forms through the optimal and efficient use of natural resources and the creation of the conditions that allow people to have quality jobs.
- Education, science, technology and innovation must be a vehicle for ending poverty in all its forms.

Social Inclusion

- Social inclusion, the defining pledge of the Sustainable Development Agenda, directs attention on various forms of inequality in areas such as education, health, nutrition, labour and immigration, and on political participation by every citizen to ensure that no one is left behind.
- Ghana's Social Protection Policy, launched in June 2016 seeks to protect the most vulnerable, to close the inequality gap and to ensure the inclusion of all Ghanaians through a coordinated and inter-sectoral social protection system that will enable people to live in dignity.
- Social inclusion ensures fair access to environmental and public goods such as clean air, clean water, parks, gardens, libraries etc.

Environmental Protection

- The SDGs are concerned with the conservation and enhancement of the physical and biological resource base and eco-systems.
- Extreme weather conditions, such as floods typically experienced in Accra and major cities in the country, are affecting people's lives, productive capacity, health and livelihoods.
- Ongoing environmental degradation is likely to have a strong impact on the poor and marginalized populations since they tend to
 - (i) depend the most on natural resources for their livelihoods,
 - (ii) live in areas that are particularly prone to environmental degradation; and
 - (iii) be less able to protect themselves against the effect of environmental degradation.

Environmental Protection

- Climate change could impede Ghana's ability to achieve the goals as it has a strong impact on various aspects of social and economic sectors.
- On the other hand, mitigation of climate change can cushion us from the shocks we experience from climate change or reduce our vulnerability.

Localizing the SDGs

Tackling SDG 1 and SDG 2

- – Planting for Food and Jobs. -

Discussions

- Exploring the range of options on integrating SDGs into the budgets: what are the key factors to consider while tailoring the approach to country context and systems?
- Is there a need for Gender sensitive budgeting
- What are the challenges and opportunities in SDG budget monitoring and accountability?
- What can the various actors do together over the next two to three years to advance practices for SDG budgeting, monitoring and accountability?
